SILVERSTONE

ABOUT US

Established in the year **2008**, at Surat, Gujarat, India, we "Silverstone Technologies India Pvt. Ltd." are one of the oldest and leading manufactures of Inkjet and U.V. Printing Machines. Backed by latest technology support, the product range made available by us find use in the textile printing industry and comprise Computer to Screen Imaging Systems like Flatbed and Spiral Rotary Inkjet Engravers, Direct to Garment printer for the T-shirt printing industry and U.V. printers for Signage and Industrial printing.

SSTIPL was one of the first company to manufacture Computer to Screen printing machine for the screen printing industry in India back in 2008. 20 years of experience of our founder and mentor Mr. Rajendra Dugar has guided our company to be able to achieve such heights in the industry.

Research is the key driver behind the success of our company, to innovate new products which are state of art and at the forefront of technology, we invest significant resources into Research and Development Of new technologies, Improved manufacturing processes and novel and improved products. Through collaboration and co-operation with world-famous nozzle manufacturer and electronics supplier, advance and practical technologies have been incorporated into our products which are then tested and tuned for the results which our machines are known for in the market.

At SSTIPL we believe in manufacturing new machines with advance and modern technologies and make them available to our customers at affordable prices which help them stay ahead of the competition. A commitment to our core values has helped Silverstone build long-term value -centric relationships with our customers and become one of the biggest and oldest inkjet printer manufacturers.

OUR VISION

To manufacture superior quality advance machines in india with Worlds best technology and expertise and make them available at affordable rates to our potential customers and become India largest manufacturer of CTS, DTG and U.V. Printing machine.

OUR PHILOSOPHY

We strive to maintain the positive growth of the company together with our customers and partners by developing and improving our products, services and technical support and offering them superior quality products to help our customers grow and manage their business profitably.

We believe that a customer relationship must be established not merely on the products, but that the customer service must be our priority and a differential element too so we provide instantaneous availability of technical assistance, support, spares and consumables which enable our customers to run the machine hassle-free for years.

We have a rich humanitarian tradition and are committed to professional collaboration, community involvement, accountability, integrity and respect with all our customers, employee, suppliers, competitors and shareholders.

To provide our employees with a better and safe working environment along with the scope to increase their abilities, skills and productivity so that the company and the employees grow together.
